**4. VISITS AND KEY INTERACTIONS WITH CLUB LEADERSHIP**

### ATTACHMENT 3

Part of the work done since the Fall meeting has been to communicate regularly with my Alumni Network and Program Committee members. (Bob King, able chair) We had tried to co-ordinate a nation-wide series of communications designed to intensify awareness and participation with the Hospital Support Program. Our schedule of communications did not materialize because of actions taken or not taken by the AA staff on campus.

The committee still desires to implement a series of communications that will inspire alumni to become active in NDSA in general and the Hospital Support Program in particular, but we need to be on the same page as the AA staff to coordinate our efforts.

As of this writing, it is not even clear to us as a committee what our role should be. We do not know what the AA is thinking or planning regarding the Hospital Program. We are looking for help from the University to lend us some star-power or some other participation that will trigger some significant involvement in the clubs.
